

## STUDENT HANDOUT HTML-CHAPTER3

### HTML TABLES

#### About Workshop:

In this workshop, We'll cover everything from the basic structure of an HTML table to more advanced topics like adding headers, formatting cells, and incorporating tables into your job portal web application. In this chapter, we are divided into five workshops, each of which illustrates how to effectively utilize these elements in your application. You can also make use of the previously learned tags.

The Scrum Master can divide the workshop among team members, and you can proceed to walk through the tasks assigned to you.

## Get Notified every new job

*Ideal platform for job seekers passionate about startups and seeking new career opportunities.*

**Expected output:-**

During this workshop, we will be constructing a homepage for job seekers. On this page, The link, alink, and vlink attributes set the colors for links in various states (normal, active, and visited).The header section includes a table that spans the entire width of the page with some top navigation links. The main content of the page is within another table. Additionally, let's incorporate a footer section as a row in our table, further enhancing the structure and completeness of our tables.
